For further information and registration:  
Mrs S. Noel: [sececoffice@gmail.com](mailto:sececoffice@gmail.com)

Deadline for registration : September 30., 2017

This course is based on a simple idea:  
Provide high level knowledge on shoulder and elbow surgery at an accessible price.

The final aim is to attract the interest of young and motivated surgeons that usually cannot afford standard and expensive cadaver labs.

In order to accomplish this aim the course is entirely sponsored by SECEC-ESSE Society with no financial support of the industries.

The benefit is that we will provide education to anyone is willing to learn, which is the main goal of our society.
